Education

Vasantdada Patil College of Engineering

Jan 2021 – May 2023

Bachelor of Engineering in Information Technology

CGPA: 8.22/10

M.H Saboo Siddik Polytechnic

June 2017 – Nov 2020

Diploma in Computer Engineering

Percentage: 85.43

Experience

Fullstack Developer | Intern

September 2025 – Present

Cubosquare Technologies

- Developed scalable Node.js, TypeScript and Express, REST APIs for an Tracking Management System alongside building responsive, route-based Next.js and Tailwind CSS layouts for a Tracking Management System.
- Implemented Payload CMS content schemas and data collections to transition static pages into a fully dynamic architecture, accelerating website content update speeds by **70%**.
- Built and maintained reusable UI components in Astro, improving consistency across pages and speeding up development for new sections/features.

Web Developer/R&D | Intern

January 2025 – August 2025

Techpaathshala

- Developed an AI-powered code review agent that accepts a GitHub repo URL and generates structured feedback on code quality and functionality.
- Improved website performance by around **30%** through frontend optimization (CSS cleanup, asset optimization, and UI performance improvements), resulting in faster load times and smoother UX.

Software Developer

August 2023 – August 2024

PNT Robotics and Automation Solutions

- Built a chatbot interface for a robotic system using the OpenAI API to enable conversational controls and interactive feature testing.
- Developed Python modules for internal workflows and programmed Arduino integrations for hardware robotics hardware controls.
- Executed software deliverables across the entire lifecycle, managing parallel pipelines from design and testing to final deployment.

Projects

MERNMORY | *React, Redux, Node.js, Express.js, MongoDB*

- * **Full-Stack Architecture:** Developed a dynamic social platform enabling users to create, read, and share posts/events via an interactive user interface linked to a custom backend.
- * **State Management:** Integrated Redux to establish predictable state containers, ensuring scalable UI component updates and smooth client-side data persistence.
- * **Database Operations:** Designed secure RESTful endpoints using Node.js and Express.js with MongoDB to manage flexible, scalable data models for content storage.

InventoryFlow | *Next, Tailwind, Nest, MongoDB*

- * **Backend Architecture:** Developed a robust backend system using NestJS, TypeScript, and MongoDB, ensuring scalable RESTful API performance.
- * **Security & Authentication:** Implemented secure JWT session management, Bcrypt password hashing, and granular permission-based access control for endpoints.
- * **Automated Workflows:** Integrated automated system communications leveraging Nodemailer for email transactions and Firebase Cloud Messaging (FCM) for real-time mobile alert notifications.
- * **Frontend Architecture:** Built an optimized UI using Next.js and Tailwind CSS, leveraging Client/Server Component architecture, global state management, and API debouncing.

Skills

Languages: HTML, CSS, JavaScript, TypeScript, C++

Frameworks & Libraries: React.js, Node.js, Express.js, Redux, Next.js, Astro.js, Vue.js, Tailwind CSS

Databases & Cloud: MongoDB, Firebase (FCM), PostgreSQL, Redis, Payload CMS, Prisma

Tools & Technologies: Git, Figma, Postman, WordPress
